

Combi LAMINATOR

RAULIMEX

- Working speed up to 375 m / min or 450 m / min
- Web width up to 1300 mm
- Unwind / Rewind roll diameter up to 1000 mm
- This has all the features of both the dry and solventless laminators

SLEEVE TYPE IMPRESSION ROLLER

KEY FEATURES:

- The dry laminating machine has an energy efficient compact two zones 6 meters long arch type dryer with a special design re-circulation system to conserve heat energy.
- The supply blowers have VFD drives for controlling the air supply from the machine panel.
- For solvent based coatings the impression rubber roller has a removable sleeve that can be easily extracted from the side.
- For solventless coating, both the steel metering rollers can be engaged and disengaged pneumatically making clean-up very easy.
- The laminating nip has an additional back-up roller to provide better optics in laminates
- Chilling roller after the heating laminating roller to bring the web back to room temperature to ensure uniformity in winding.

OPTIONAL:

- Corona treater.
- Motorized smoothing bar for water-based coatings.
- Cold Seal in Register.
- Registered lamination.
